## Centre Research Theme 2023–2027

### Intergenerational Research on Well-Being and Quality of Life

The Centre will focus on research in relation to intergenerational well-being and quality of life. It aims to identify patterns of continuity or change in beliefs, values, and various attributes across generations, as well as the mechanisms that facilitate or hinder their transmission in shaping well-being and quality of life of different generations. Its findings will have significant research and practical implications in informing the development of programmes, interventions, and policies that promote positive outcomes of individuals, families, and the society.

Subthemes:

1. Well-being by generations
2. Intergenerational solidarity and well-being
3. Intergenerational thriving in life challenges
