## **2022-2023 Wednesday Lunchtime Seminar Series**

### **Neural Correlate of Resilience and Post-Traumatic Stress Disorder**

**30 Nov 2022 | 12:30 pm - 2:00 pm (Hybrid Mode)**

 **RHB 108, Research Complex, HKSYU, 6 Wai Tsui Crescent,  
Braemar Hill, Hong Kong**

 **Zoom Meeting ID: 980 0989 5132**

**Speaker: Dr. Delin Sun**

During the past decade, our understanding of the neural correlates of posttraumatic stress disorder (PTSD) and resilience to PTSD has extended from abnormalities in individual brain regions to structural and functional between-region connections, and then to the whole-brain networks. The findings will enhance our understanding of the complex changes in the brain of PTSD patients, and may also help to develop more precise ways of diagnosis and treatment.

Dr. Sun obtained his PhD degree in Biophysics from the University of Science and Technology of China. He is now an assistant professor in the Department of Psychology, The Education University of Hong Kong. Dr. Sun investigates human brain structures and functions in both healthy people and clinical patients with Alzheimer's disease, depression, and PTSD, using neuroimaging approaches.
